

# CHARACTERS IN PLACE

Hello - this project is to make and (virtually) share paper characters. Feel free to participate at any level or in any way you like!

① Cut out the images on the opposite page along the outlines and dashed lines

② Slide the corresponding pieces together. The character should now stand upright!

③ OPTIONAL - make your own! draw/paint/collage your own character!

- make sure to use some type of slightly thicker paper (like the back of this card)
- make the base wide so it stands up well
- make sure this length → [  and this length → [  are the same

④ Place the characters somewhere! This could be in your kitchen, your backyard, etc. ! Feel free to get weird with it!

⑤ Share a photo of the placed character(s) (if you like)! Email me your photo at [tealarrow@gmail.com](mailto:tealarrow@gmail.com) or post it on Instagram with the hashtag #charactersinplace. I will share all the photos I receive on my Instagram (@tealarrow) and on my website ([tealfrancis.com](http://tealfrancis.com)) Can't wait to see your characters in place! xo Teal
